

Savitribai Phule Pune University
Fourth Year of Artificial Intelligence and Data Science (2020 Course)
Elective IV 417524(B): Information Retrieval

Teaching Scheme: TH: 03 Hours/Week	Credit 03	Examination Scheme: In-Sem (Paper): 30 Marks End-Sem (Paper): 70 Marks
---	----------------------------	---

Prerequisites Courses: Data Structures and Algorithms (210252), Database management systems(310241)

Companion Course: Computer Laboratory II (417526)

Course Objectives:

- To understand the basics of Information Retrieval
- To understand the concepts of Indexing & Query Processing for Information Retrieval
- To provide comprehensive details about various Evaluation methods
- To understand the different methods of Text Classification and Clustering
- To understand various search engine system operations and web structures
- To understand various applications of Information Retrieval

Course Outcomes:

After completion of the course, learners should be able to-

CO1: Understand the concept of Information Retrieval

CO2: Use an indexing approach for retrieval of documents

CO3: Evaluate and analyze the retrieved information

CO4: Apply appropriate method of Text Classification and Clustering

CO5: Design and implement innovative features in search engines

CO6: Analyze different real-life application of Information Retrieval

Course Contents

Unit I	Introduction	06 Hours
Introduction to information retrieval, Major challenges in IR, Features of an IR system, components of an IR model, IR system block diagram, Boolean retrieval, Information versus Data Retrieval, Text categorization, IR processes and fields, Vector Model, Probabilistic Model and Latent Semantic Indexing Model.		
#Exemplar/Case Studies	Visualization and Information Retrieval Techniques for Network Intrusion Detection	
*Mapping of Course Outcomes for Unit I	CO1	
Unit II	Dictionaries and Query Processing	07 Hours
Components of Index, Index Life Cycle, Static Inverted Index, Dictionaries-Types (Sort Based, Hash Based, Interleaving & Posting Lists), Index Construction (In memory, Sort Based, Merge Based, Disk Based Index Construction), Dynamic Indexing, Query Processing for Ranked Retrieval, Document at a Time Query Processing, Term at a Time Query Processing, Pre-computing Score Contributions, Impact Ordering, Query Optimization.		
#Exemplar/Case Studies	Matching of the searched statement with the database which is already stored	

*Mapping of Course Outcomes for Unit II		CO2
Unit III	Probabilistic Retrieval and Language Modelling related methods	07 Hours
<p>Probabilistic Retrieval: Review of Basic Probability Theory; The Probability Ranking Principle; The 1/0 loss case, the PRP with retrieval costs; The Binary Independence Model; Term Frequency; An appraisal and some extensions: An appraisal of probabilistic models, tree-structured dependencies between terms, Okapi BM25: a non-binary model, Bayesian network approaches to IR, Relevance Feedback, Field Weights:BM25F.</p> <p>Language models for information retrieval: generating queries from documents; Language models: finite automata and language models; types of language models; multinomial distributions over words; Ranking with Language Models; Divergence from Randomness, Passage Retrieval, and Ranking.</p>		
#Exemplar/Case Studies		A Comparative Study of Probabilistic and Language Models for Information Retrieval
*Mapping of Course Outcomes for Unit III		CO3
Unit IV	Text classification & Text clustering	07 Hours
<p>Text Classification: Introduction to Text Classification, Naïves Bayes Model, K Nearest neighbor, spam filtering, Support Vector Machine Classifier, Vector Space classification using hyperplanes, kernel function.</p> <p>Text Clustering: Clustering vs Classification, partitioning methods. Clustering Algorithms: k-means clustering, Agglomerative hierarchical clustering, Expectation Maximization, Mixture of Gaussians Model</p>		
#Exemplar/Case Studies		Case Study :Improving Document Organization and Retrieval in a Digital Library
*Mapping of Course Outcomes for Unit IV		CO4
Unit V	Web Retrieval and Web Crawling	07 Hours
<p>Parallel information retrieval: Parallel query processing, Mapreduce</p> <p>Web Retrieval: Search Engine Architectures, Cluster based Architecture, Distributed Architectures, Search Engine Ranking. Link based Ranking, Page Ranking Algorithm, Simple Ranking Functions and Evaluations.</p> <p>Web Crawler: Web Crawler structure, Web crawler libraries, Python Scrapy, Beautiful Soup, Applications</p>		
#Exemplar/Case Studies		Study of Google Map/ Geogusser information retrieval
*Mapping of Course Outcomes for Unit V		CO5
Unit VI	IR applications	07 Hours
<p>Multimedia Information Retrieval: Spoken Language Audio Retrieval, Non-Speech Audio Retrieval, Graph Retrieval, Imagery Retrieval, Video Retrieval</p> <p>Recommender System: Collaborative Filtering, Content Based Recommendation, Knowledge Based Recommendation Information Extraction and Integration: Extracting Data from Text. Semantic Web, Collecting and Integrating Specialized Information on the web.</p>		

#Exemplar/Case Studies	Demonstrate Collaborative filtering using any datasets to recommend items to users
*Mapping of Course Outcomes for Unit VI	CO6
